through the reefs  
like a plague of  
locusts! One  
lionfish can eat 20  
smaller fish in 30  
minutes.*

TCBT anglers  
**AND** the public!

*C'mon, lionfish.  
Make my day!*

**Ravage the Savage** invites the community to join the battle against the rapid invasion of non-native lionfish into the Caribbean by removing as many as possible. With their population explosion and aggressive behavior, lionfish could create the most disastrous marine invasion in history by drastically reducing the abundance of coral reef fishes and leaving behind a devastated ecosystem. Lionfish are primarily caught by spearfishing with a Hawaiian sling. Tasty to eat!

Participate in both and register for the **Treasure Cay Billfish Tournament, June 13-18, 2010**
